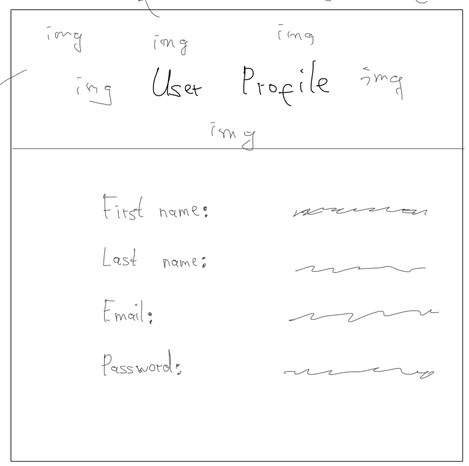
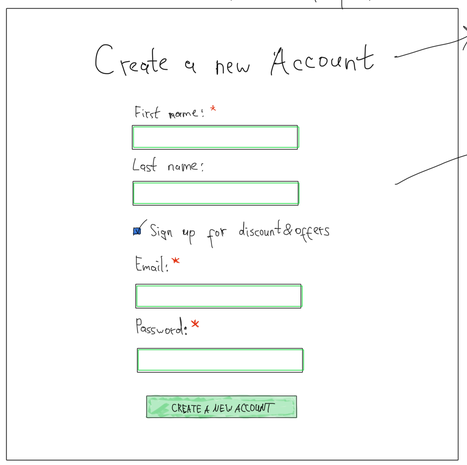
Profile management

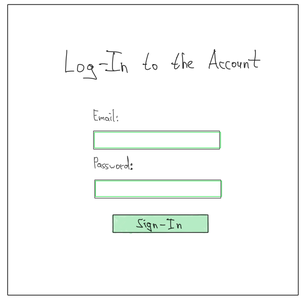


for the background there will be an image

Sign in/Sign up page



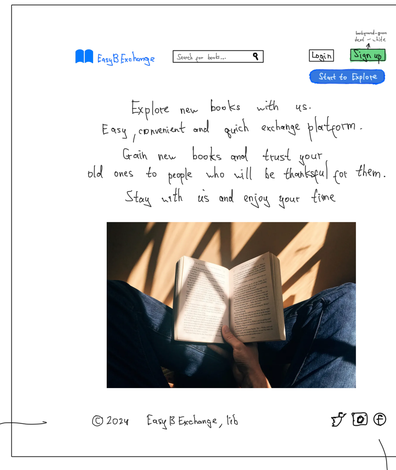
hr will be in bolds



Add Profile management page.

Also making a post page.

MainPage



header

footer

link to our companies socials media platforms

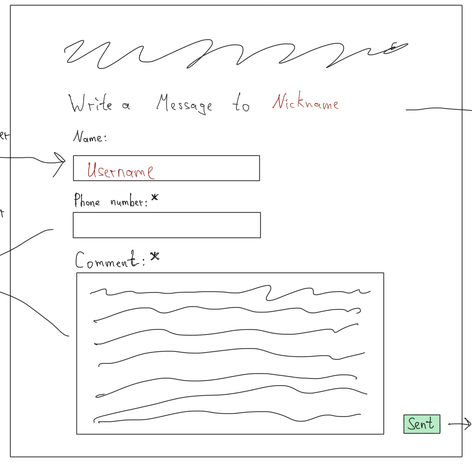
Post Page

 tag

Create it with grid, when only one post it will expand to the whole designed div

Nav along with footer will be the same all over the other pages via „include" method in PHP

Chat Page



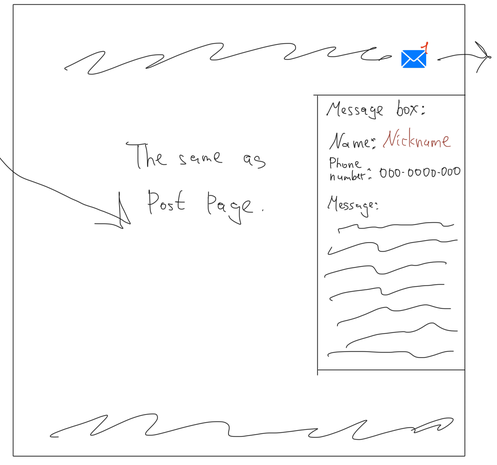
We will use $_Session["...."] to get the name of the user

The name of the user automatically be parsed by $_POST method to the for

Contact Info is needed for them to contact to each other for an exchange trade, And it will turn red if user doesn't enter anything. Because it's necessary for an exchange.

After sent button is sent it will be redirected to the „Post Page"

Message Receival Example Page



After pressed one time it will be opened

The same as Post Page.
